Package Overview

The **TechRisk Management Pro Accelerator Package** - delivered within 10 months, is a comprehensive and action-driven training package designed to equip professionals with the knowledge, skills, and practical experience needed to implement effective technology risk management strategies.

TechRisk Management Foundation Course

Gain a solid understanding of the principles and frameworks that underpin technology risk management. This course is perfect for building foundational knowledge and setting the stage for advanced learning.

TechRisk Management Lead Implementer Course

Advance your expertise with in-depth training on managing and leading the implementation of technology risk management strategies within your organisation. Learn how to align initiatives with business objectives and industry standards.

Guided Project Implementation Program

Participate in eight immersive Guided Action Sessions that provide hands-on support as you apply what you've learned. These sessions focus on your own real-world scenarios and projects, enabling you to:

- Develop and execute actionable implementation plans.
- Solve real-world challenges under expert guidance.
- Drive successful outcomes tailored to your organisation's needs.

TechRisk Management Foundation

Duration: 2 Days + Exam on day 3

In this “information age” organisations are highly dependent on Information Technology (IT). Technological advancements have transformed traditional business models and given rise to new capabilities for delivering products and services.

While technology and digital solutions are a fundamental enabler of organisations in the 21st century, the accompanying opportunities and risks require managing.

Our course is designed to provide participants with a better understanding and proactive approach to managing technology-enabled opportunities and risks. This course equips you with necessary knowledge to guide your organisation to navigate the complexities of the digital age with confidence.

The course includes methods and insights which will reward experienced risk, assurance, and compliance professionals.

You will learn the key Technology Risk Management concepts and principles in a straightforward and pragmatic way. By equipping you with the necessary knowledge and skills, this course empowers you to guide your organisation towards optimising the technology and cyber risks it will encounter.

TechRisk Management

Lead Implementer

Duration: 5 Days

While information technology is a fundamental enabler for any organisation in the 21st century, the accompanying opportunities and challenges require a structured approach to managing TechRisks to optimise investments.

To meet these challenges, Vital Learning Edge presents a training workshop, helping staff across your organisation to understand technology opportunity and risk management capabilities; and how to develop and continually improve them for your technology and enterprise landscape.

Successful organisations and professionals differentiate themselves by focusing on positive risk (opportunities or strategic/operational planning) management with an equal level of importance as managing negative risks (issues and challenges).

With no single internationally accepted best practice to guide implementation of a TechRisk Management Framework, most Governance, Risk and Compliance (GRC) professionals have relied on disparate frameworks for IT Governance or Information / Cyber Security to anchor their TechRisk management capability implementation. This often results in organisations having limited success in achieving their business objectives or securing the full benefits of their technology capabilities.

Course Content Modules

- The Role of Technology Risk Management
- Defining the Tech Risk Approach
- Understanding the organisation, it's risks, opportunities & objectives
- Understanding technology, information controls & the operational environment
- Continual Improvement using TRMF

Who Should Attend

- Enterprise and IT Risk professionals responsible for managing TechRisk
- Internal champions and advisors involved in IT and TechRisk management
- IT Governance and Assurance professionals
- IT executives and leaders
- Professional services consultants and advisors
- Anyone intending to pursue a career in TechRisk Management

PRE-REQUISITES

- TechRisk Management Foundation course
- Alternatively, hold a Certification in IT Risk Mgmt (e.g., CRISC)
- A basic knowledge of Enterprise Risk Management principles & terminology
- Familiarity with IT governance frameworks (such as COBIT, ITIL) as well as TechRisk related ISO standards (such as ISO27001, ISO2000, and ISO22301) is highly recommended

Guided Project Implementation

The Details

The **Guided Project Implementation Program** is the hands-on, practical component of the TechRisk Management Pro Accelerator Package, designed to help participants bridge the gap between theory and practice. Over the course of eight immersive 2-hour Guided Action Sessions, participants will discuss their projects with peers and receive expert guidance as they apply their learning to their own real-world projects, ensuring successful and impactful outcomes.

What to Expect

- **Expert-Led Guidance:** Each session is facilitated by experienced trainers and consultants who provide personalised feedback and practical advice.
- **Real-World Application:** Participants work on actual projects relevant to their organisational context. *(A case study can be provided if required).*
- **Action-Oriented Approach:** The focus is on solving challenges, executing plans, and driving measurable results.
- **Collaborative Environment:** Engage with peers to share insights, troubleshoot issues, and refine strategies in a supportive learning space.

Program Highlights

- **Step-by-Step Implementation Support**
 - Learn how to systematically implement technology risk management frameworks, from initial planning to execution and monitoring.
- **Interactive Problem Solving**
 - Address challenges in real-time with guidance from experts and input from peers.
- **Customised Solutions**
 - Tailor your implementation strategies to align with your organisation's unique objectives, risks, and compliance requirements.
- **Final Project Presentation & Recognition**
 - At the conclusion of the program, participants will have the opportunity to present their completed projects to a panel of experts and peers. Successful participants will receive an **Applied TechRisk Implementer Certificate**, recognising their achievement.

Corporate/Team Program Solution

The **Corporate Guided Project Implementation Program** is a bespoke solution tailored to meet the unique needs of your organisation. Combining the structured, hands-on approach of our Guided Project Advisory Workshops with the strategic expertise of our consulting arm, **Vital Advisory**, this program is designed to drive impactful results for your project teams and business objectives.

Tailored Solutions

Practical Application

Enhanced Collaboration

Initial Business Consulting & Data Gathering (2–3 Days)

Kickstart the program with an in-depth consulting engagement led by our expert advisors. This phase focuses on understanding your organisation's goals, gathering key data, and aligning project objectives with business priorities.

Guided Project Advisory Workshops

Over the course of the program, your project teams will participate in structured Guided Project Advisory Workshops designed to:

- Apply risk management strategies directly to your company's project.
- Solve real-world challenges with guidance from experienced facilitators.
- Foster collaboration and innovation within the team.

Ongoing Business Consulting Support

Throughout the program, your teams will benefit from the insights and expertise of Vital Advisory's consultants, ensuring alignment with organisational goals and overcoming any roadblocks.

Awareness Sessions & Training for Cohorts

Equip your teams with the foundational knowledge they need through targeted awareness training sessions. Delivered in cohorts, this training ensures alignment across the organisation and prepares participants for the guided implementation phase.

The **Corporate Guided Project Implementation Program** combines expert guidance, practical application, and tailored business consulting to deliver tangible, long-term value for your organisation. **Contact us for an obligation free quotation today!**
